The Meyer Rebuild Process

- Free Estimate
- Each unit is fully inspected including gears, impellers and casing
- Individual parts dimensions are verified versus new specifications
- Impellers are welded, brazed and machined to original OEM specifications
- Shafts are rebuilt including metalizing and grinding
- Head plates are ground and true
- Impeller case is re-bored and ground to new specifications
- Unit is re-assembled with all new OEM parts including bearings and seals
- All blowers are run tested on our 75HP variable speed test stand
- Sound, Vibration and Slip Tests are documented

All backed by a 12 month warranty

We service all brands including:

- Fuller
- Sutorbilt
- MD Tuthill
- Kaeser
- Schwitzer
- DuroFlow
- Gardner Denver
- Cycloblower
- Hibon
- Roots
